CERTIFICATIONS

LEED (Leadership in Energy and Environmental Design) is an internationally recognized green building certification system, providing third-party verification that a building or community was designed and built using strategies aimed at improving performance across all the metrics that matter most: energy savings, water efficiency, CO2 emissions reduction, improved indoor environmental quality, and stewardship of resources and sensitivity to their impacts.

BREEAM is an assessment undertaken by independent licensed assessors using scientifically-based sustainability metrics and indices which cover a range of environmental issues. Its categories evaluate energy and water use, health and wellbeing, pollution, transport, materials, waste, ecology and management processes.

ISO 14001:2015 specifies the requirements for an environmental management system that an organization can use to enhance its environmental performance. ISO 14001:2015 is intended for use by an organization seeking to manage its environmental responsibilities in a systematic manner that contributes to the environmental pillar of sustainability.

Eco-Management and Audit Scheme (EMAS) Registration. This is an important recognition of a European level that aims at the continuous improvement of production standards and awareness of all its employees in terms of protecting the environment. The EMAS system is a voluntary awareness for those companies committed to evaluating and improving their environmental efficiency through a more responsible choice of buying and management, a more careful use of air, water, territory, raw materials and energy.
