TECHINCAL INFORMATION

- Use fast setting adhesives
- Apply sealers such as DRY TREAT during the installation process
- Use stone friendly grout and silicones

Flutes are a decorative design element for vertical surfaces and should be handled with care. The product should be supported on both ends, preferably carried vertically when handled once removed the Styrofoam boxes.

Installation should be completed using stone suitable fast setting adhesive or silicone to a flat, non-moisture sensitive substrate. Upon installation, the stone should be sealed with appropriate stone sealer.
