

Type-32

The decorative counterpart to WOOD-STOCK is the TYPE-32 which has a range of graphic patterns. Designed by Diego Grandi, TYPE-32 uses four colours from the WOOD-STOCK series. Each colour comes in four different graphics with a choice of warm or cold shades, allowing for multiple combinations of graphic elements to create a unique and dynamic look.

PRODUCT TYPE: 5.5mm Fibreglass reinforced lightweight porcelain slabs (11.5kg/m²)

COLOURS: Snow, Honey, Vintage, and Coffee

SIZES: 200X2000mm Rectified edges

FINISHES/USAGE: Matt/Indoors Only (Suitable for soft shoe areas)

AESTHETIC QUALITIES: Natural wood appearance and surface finish with graphic elements

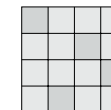

TECHINICAL INFO: Easily maintained with conventional cleaning products

Cut and drill with standard glass and ceramic tools

Graffiti, fade, fire and chemical resistant
See last page for all technical data

ORIGIN: Italy

VARIATION:

LARGE FORMAT | STRENGTH | DURABILITY | EASY MAINTENANCE | LIGHT WEIGHT | RENOVATIONS MADE EASY

Laminated porcelain stoneware with a fiberglass backing allows for tension to be spread evenly, thus making this extremely strong for a thin porcelain slab.

Large formats (up to 1000x3000mm) allow for fewer grout joints, which offers the visual advantage of making spaces look larger.

Lightweight format means Slimtech's application is versatile: splash backs, walls, bench tops, joinery and facades.

Latest technology in porcelain stoneware creates a surface flatness second to none.

Slabs are only 5.5mm thick making them easy to cut, drill and install.

Easy to renovate over existing wall and floors tiles (surface/substrate must be flat) saving on demolition and labour costs.

Resistant to stains and chemical agents making it easy to clean and maintain. No sealing required.

Slimtech is eco friendly - uses less materials, environmentally friendly kilns and there is more square metres per shipment .

5.5mm thickness is 11.5kgs per square metre.

For more technical information about installation, cleaning and care, please download the SLIMTECH MANUAL PDF on our website.

Through Panariagroup Industrie Ceramiche S.p.A., Lea Ceramiche is an ordinary member of the Green Building Council and GBC Italia.

Thanks to built-in technology based on silver, our tiles are protected by an innovative antibacterial shield that eliminates up to 99.9% of bacteria on surfaces and guarantees long-lasting protection against wear and tear, climatic conditions and repeated cleans in any usage environment.

The Microban® protection is incorporated into the tiles during the production process; once bacteria comes into contact with the Microban® surface, the technology works by disrupting its biological function.
